

## **EE 422C Project 4 (Criticter Part 1) Team Plan**

Dhruv Verma dv7229  
Daniel Laveman del824  
Group 14  
Spring 2017

GitHub: <https://github.com/dhruv1702/Critters>

We communicated through texts to discuss the initial GitHub setup as well as plan out the rest of the project. We decided to divide up the methods and then meet to test them all out together. Dhruv will create the `displayWorld()` and `makeCriticter()` methods like `walk`, `run` and `reproduce`, while Daniel will create the `doEncounter()` and `fight` methods.

We will be meeting on March 6th and 7th to test out the code using JUnit and the provided test files. We will then clean up the code make any final modifications together before submitting on the 7th.

.

Dhruv will create custom Critters `Criticter1` and `Criticter2` while Daniel will create `Criticter3` and `Criticter4`.
